SENSoR project Star Rating of motorways and other national roads in South East Europe

EuroRAP/IRAP Star Ratings provide a simple and objective measure of the level of safety 'built in' to the road for vehicle occupants, motorcyclists, pedestrians and bicyclists. 5-star roads are the safest, and 1-star roads are the least safe. Star Ratings are based on road inspection data collected through surveys and analysis.

Further details at: http://www.irap.org/en/about-irap-

Star Ratings

- High scores associated with the road's built-in safety levels
- Medium scores associated with the road's traffic safety levels
- Low scores associated with the road's accident management levels
