EuroRAP Star Ratings provide a simple and objective measure of the level of safety built into the road for vehicle occupants, motorcyclists, pedestrians and bicyclists. 5-star roads are the safest, and 1-star roads are the least safe. Star Ratings are based on road inspection data collected through surveys and analysis. Further details at: [http://www.irap.org/en/about-irap-3/methodology](http://www.irap.org/en/about-irap-3/methodology)
